LOCROOM PLATAFORM:

HIRING FREELANCER: FRONT-END DEVELOPER

TASK LIST #1:

1. Create a Landing page to the Locroom em HTML similar to "ArchitectUI/Pages/Login" with rotating banner, two content area and two footers (View 1);
2. Customize the template ArchitectUI (REACT.JS/HOOKS) to create the Front-End layout and the workflow of LocRoom Platform;
3. Build the automatic menu according to the logged-in user's (users has rooms, contracts e projetos and negotiation rooms has negotiations) (View 2);
4. Build the screen to "negotiation room" (View 2);
5. Build the basic screen to "negotiation" with two menus responsive and retractable (View 3 and 4);
6. Build the internalization to translate into English and Portuguese.

   Notes:
   1. Only landing page is in HTM. Everything else is in react.js/hooks.
   2. The TASK LIST #2 will have all especifications about the "negotiation room" and "negotiation".
